

Name: _____ Date: _____

Tom and his garden

Tom has a garden. In the garden, he grows flowers and vegetables. Every day, Tom waters the plants. He uses a watering can to water them. The flowers are bright and colourful. The vegetables are green and fresh. Tom also weeds the garden. When he sees weeds, he pulls them out so that the plants can grow better. He puts the weeds in a pile and throws them in a garbage bin.

Tom plants vegetables in the garden. He likes to pick the vegetables when they are ready.

Today, he finds ripe tomatoes and crisp lettuce. Tom picks the tomatoes and the lettuce. Then, he puts them in a basket. He

takes them inside and shows them to his parents. Tom's parents are happy with the vegetables. They say, "Thank you, Tom." Tom smiles and says, "You are welcome." Tom enjoys working in his garden. He likes to grow his food.

What does Tom grow in his garden?

How does Tom water the plants?

What do the flowers look like?

How does Tom remove the weeds from the garden?

What does Tom do with the weeds after he pulls them out?
